

» SNOW ATLAS PLATFORM DATASHEET

Quickly get control of software budgets and risk across your hybrid IT environment

» AT A GLANCE

Snow Atlas is a cloud-native software asset management (SAM) and SaaS management solution that gives organizations deep and comprehensive insights into software usage, empowering them to uncover shadow IT, prepare for audits and identify opportunities for savings within weeks. With an integrated view into software usage and risk across your on-premises, SaaS and cloud licenses, you can solve a wide array of problems across your global organization.

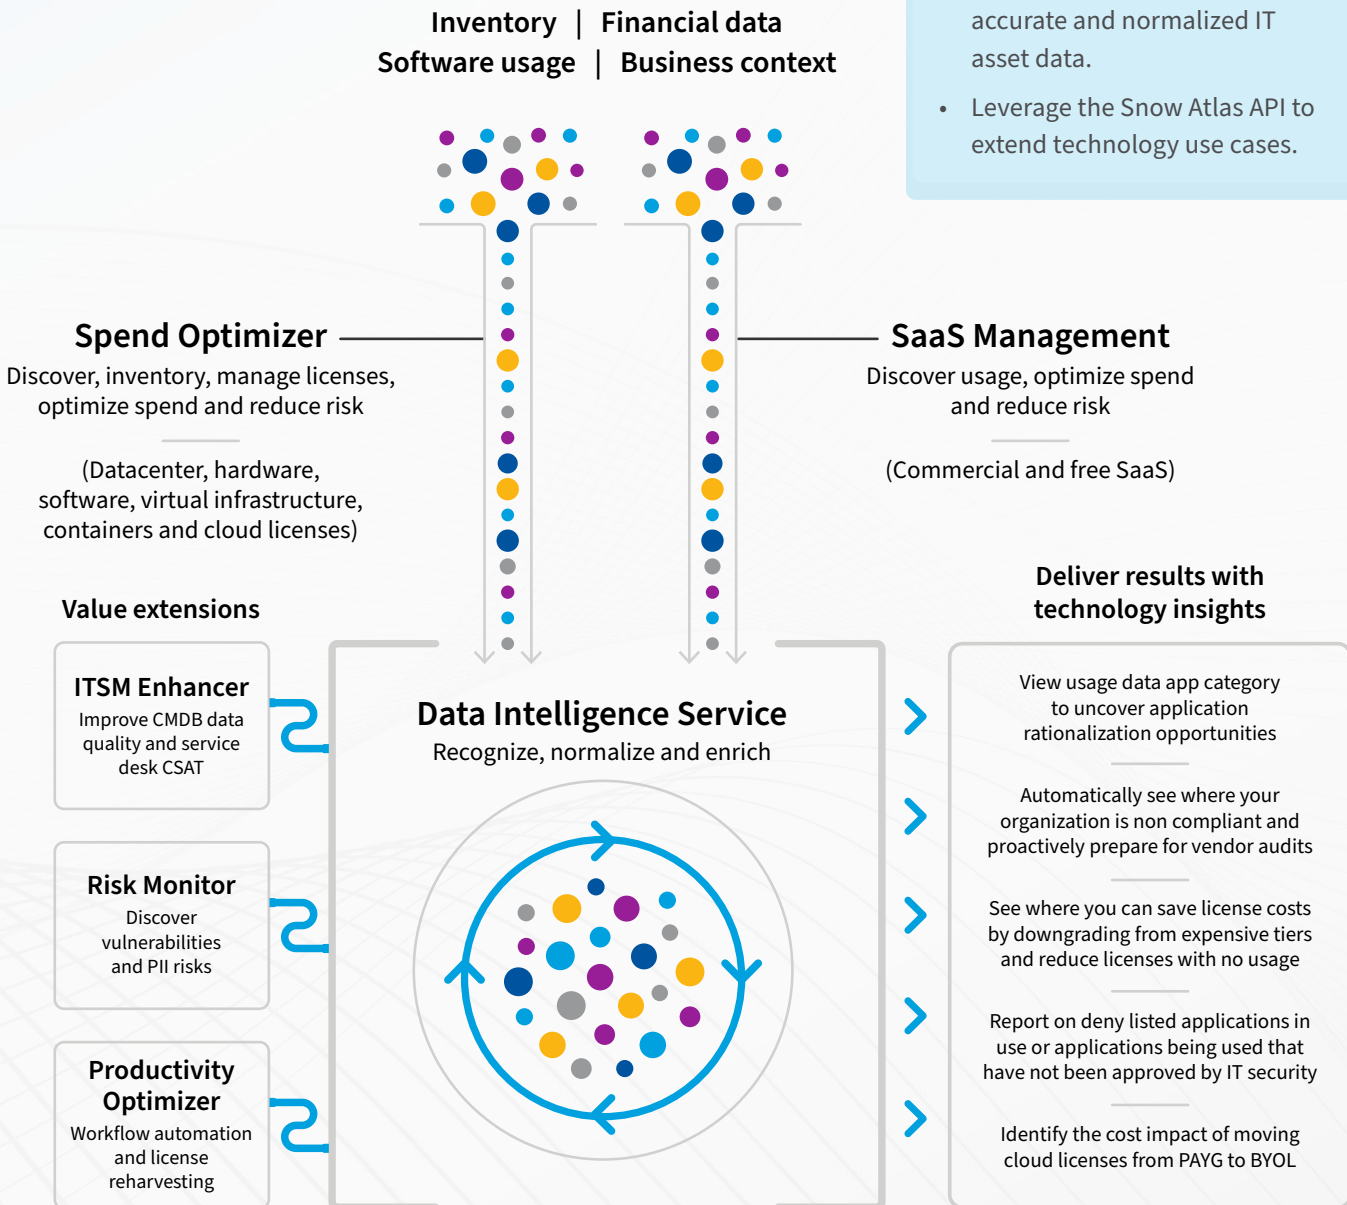

Get to your first SAM and SaaS outcome in 30 days

Your organization can't afford to wait for results. Even small teams can find savings quickly with Snow Atlas. Uncover opportunities to optimize usage and go into your next renewal prepared to get the best deal. Share insights with stakeholders across your organization so the entire enterprise can drive positive outcomes—everything from identifying cost savings to risk reduction.

NOW YOU CAN

- Always be audit ready.
- Stop paying for more licenses than what's needed.
- Reduce waste on premium license tiers that aren't being used.
- Manage software sprawl with visibility to a comprehensive application catalog and identification of redundant applications.
- Provide your CMDB with clean, accurate and normalized IT asset data.
- Leverage the Snow Atlas API to extend technology use cases.

Intelligence to strengthen stakeholder decision making

IT asset management | IT operations | IT service management | IT security | Procurement | Finance

Security and peace of mind are standard

Snow Atlas provides a range of data storage locations across the world, including Australia, the United States and Europe, to enable customers to meet their data residency and privacy requirements. Our solution is proven to be safe and secure with industry SOC 2 Type 2, ISO/ ISE 27001 and Cloud Security Alliance: STAR certifications.

Snow Atlas comes standard with 24/5 support and provides continuous access to the latest features with no costly upgrades required.

“

Using these solutions, we found 236 cloud-based applications that both we and the department heads simply didn't know about, and we even discovered users with illicit gaming software. We gained real-time insight into our security risks, software consumption and asset inventory to help the Council make better strategic decisions in support of service delivery.”

Colin Lawrence, IT Asset Management Team Leader
Christchurch City Council

About Flexera

Flexera helps organizations understand and maximize the value of their technology, saving billions of dollars in wasted spend. Powered by the Flexera Technology Intelligence Platform, our award-winning hybrid IT asset management and FinOps solutions provide comprehensive visibility and actionable insights on an organization's entire IT ecosystem. This intelligence enables IT, finance, procurement and cloud teams to address skyrocketing costs, optimize spend, mitigate risk, and identifies opportunities to create positive business outcomes.

More than 50,000 global organizations rely on Flexera and its Technopedia reference library, the largest repository of technology asset data.
