flexera™

IT Visibility and IT Asset Management: Solving for complex IT asset issues

IT Visibility for data-driven decision making and **IT Asset Management** for cost-effective, compliant, and automated IT operations. Which best supports your current IT organization?

Flexera One IT Visibility

Features and benefits:

- **Technopedia catalog and identification:** Speeds up research and validation by 60 percent, covering 80 percent of identified assets and 4,500 unique updates daily

- **Technology Data Hub:** Centralized view of your technology and detailed visibility into asset inventory

- **Decision-ready technology intelligence:** Risk mitigation on unsupported technology

- **Integration with hybrid IT ecosystem:** Minimizes manual data maintenance efforts

- **Unified data visibility and reporting:** Offers dynamic charting and self-service data exploration
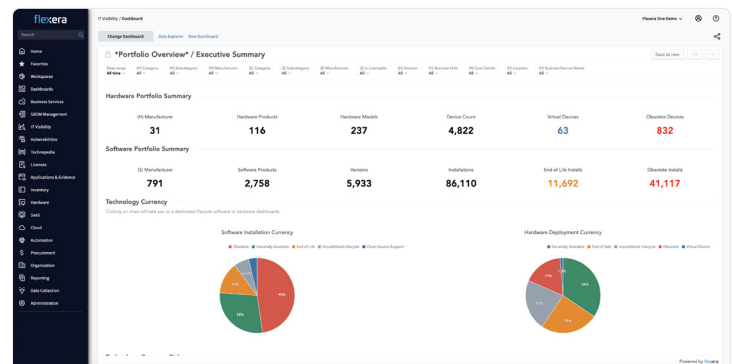

Use cases:

- **Tech debt and obsolescence management:** Proactively plans against tech obsolescence, ensuring the IT estate remains current and evergreen

- **Portfolio rationalization:** Address IT sprawl by standardizing applications and driving cost savings

- **Vulnerability recognition and security enhancement:** Identifies and addresses vulnerabilities

- **CMDB enrichment:** Ensures that the configuration management database (CMDB) remains a reliable source of truth for IT estate management

When to choose IT Visibility

Proactive planning against tech debt and obsolescence: Gain insights into outdated technologies for financial and operational planning.

Portfolio rationalization and cost savings beyond traditional license optimization: Group similar items, identify software sprawl, and standardize applications.

Prioritized insights into security vulnerabilities: Prioritized insights into potential software risks in software installations.

Manage, govern and optimize your IT assets with Flexera One IT Visibility

Flexera One IT Asset Management

Features and benefits:

- **Discover IT assets across your estate:** Discover and inventory even the most elusive software, SaaS and hardware such as IBM Cloud Paks or Oracle Java SE

- **Software license optimization:** Creates an effective license position

- **SaaS management and optimization:** Discovers SaaS apps and reclaims inactive licenses

- **Hardware asset management:** Automates the hardware asset lifecycle
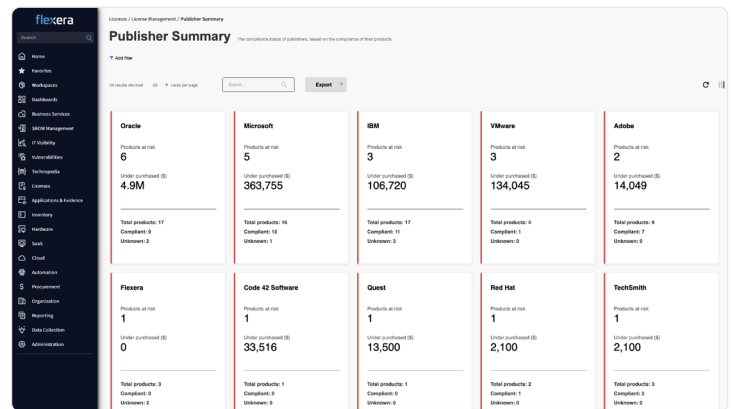

Use cases:

- **License entitlement and vendor negotiations:** Optimized licenses and applications positions

- **License optimization:** Maintains compliance, avoiding unbudgeted expenses

- **Audit readiness:** Addresses unauthorized tech usage; (42 percent of organizations spent $1 million or more on unbudgeted audit expenses in the past three years)

- **Shadow IT risk management:** Recognizes and addresses shadow IT, contributing to overall security

When to choose IT Asset Management

Complex license management and optimization across major vendors: Manage complex software license compliance across major vendors.

Audit readiness and compliance: Maintain an ongoing audit readiness posture to avoid unbudgeted expenses.

Recognizing and addressing shadow IT risks: Address unauthorized tech usage, ensuring compliance with regulations like GDPR and HIPAA.

Optimize and negotiate your license positions in Flexera One ITAM

About Flexera

Flexera delivers SaaS-based IT management solutions that enable enterprises to accelerate digital transformation and multiply the value of their technology investments. We help organizations *inform their IT* with definitive visibility into complex hybrid IT ecosystems, providing unparalleled IT insights that allow them to seize technology opportunities. And we help them *transform their IT* with tools that deliver actionable intelligence across an ever-increasing range of dimensions to effectively manage, govern and optimize their hybrid IT estate.
